

LAP-D Assessment Parent Report  
Mid year assessment

To the parent of \_\_\_\_\_,

The LAP-D assessment is a developmental assessment that measures skills which are generally learned during the preschool years. Your child was assessed at the beginning of the school year. This is the second assessment. He/she will be reassessed again at the end of the school year. The assessment measures skills in eight areas. The eight areas, with a simple explanation of each, are:

- 1-fine motor manipulation-the ability to use the small muscles of the hand to perform certain tasks
- 2-fine motor writing- the ability to use the small muscles of the hand to perform various writing tasks
- 3-cognitive matching- thinking ability to perform matching activities
- 4-cognitive counting- thinking ability to perform tasks related to numbers, language, and counting
- 5-language naming- the ability to name objects and colors upon request
- 6-language comprehension- the ability to follow instructions upon request
- 7-gross motor body movement- the ability to use large muscle groups of the body upon request, such as walking, running, skipping
- 8-gross motor object movement-the ability to use the large muscles of the body to perform tasks such as throwing and catching

Listed below are the age equivalent scores for your child based on his/her mid year LAP-D assessment. Age equivalent scores indicate how a child's performance compares with other children at a given age level. For example, if a child is 24 months old and has an age equivalent score of 36 months, this means that in that area the child scored at a level that is average for a 36 month old child.

Your child's age in months at the time of the assessment was \_\_\_\_\_ months.

Your child's age equivalent score in each of the eight areas were:

fine motor manipulation	_____
fine motor writing	_____
cognitive matching	_____
cognitive counting	_____
language naming	_____
language comprehension	_____
gross motor body movement	_____
gross motor object	_____

If you have concerns about your child's development, please speak to your center's lead teacher or center supervisor.
