

Communicable Disease Notice

Dear Parents and Guardians,

Our agency is required to notify parents when certain communicable diseases have been introduced in our center. We currently have a case of

_____ in our center.

There is no need to remove your child from the center at this time. The licensing counselor requires this notice since you may want to advise your child's medical provider of his/her exposure to this illness, if symptoms develop. Our staff will be watching the children for any signs of sickness. You will be notified immediately should there be a need for your child to be taken home.

Sincerely,
Head Start Staff Members
